Professional Summary

M.S. Candidate in CS specializing in **Agentic AI, Multi-Agent Orchestration, and Enterprise RAG Systems**. Applied hands-on expertise through advanced graduate projects—architecting autonomous workflows with **LangGraph**, fine-tuning open-source LLMs (**Llama-3**), and containerizing inference backends via **Docker and FastAPI**. Seeking a part-time remote AI Engineering Internship (GenAI / Agentic AI) to apply production-oriented research to scalable real-world systems.

Education

M.S. Computer Science (Specialization in Agentic AI & Machine Learning)

SRM Institute of Science and Technology (SRMIST)

July 2026 – Present

Chennai, India

- Current Graduate Student

Bachelor of Computer Applications (BCA)

Silver Oak University

2023 – 2026

Ahmedabad, India

- **CGPA: 9.40 / 10.00** (Top 1% of cohort)
- Graduated with distinction.

Key AI & Agentic Projects

Production-Grade RAG Agent with Tool Execution

[[GitHub](#)]

Built with LangChain, LangGraph, Python, Vector DB, REST APIs

2026

- Architected an autonomous RAG agent capable of executing custom API tools and dynamically routing queries based on intent.
- Implemented semantic search and context retrieval pipelines to reduce model hallucinations during document QA.
- Formatted structured outputs and error-handling loops to ensure reliable tool execution in production workflows.

Student Mental Health Prediction & Analysis System

[[GitHub](#)]

Built with Python, Scikit-Learn, Pandas, NumPy, Matplotlib

2025

- Developed a machine learning classification model to analyze student survey data and predict mental health risk levels.
- Performed data cleaning, outlier handling, and feature engineering to improve model accuracy and interpretability.
- Evaluated model performance using precision, recall, and F1-score metrics across multiple algorithm baselines.

Skills

- **Programming & Web APIs:** Python · C++ · SQL · REST APIs
- **Machine Learning & Data Science:** Natural Language Processing (NLP) · Machine Learning Fundamentals · Statistical Analysis · PowerBI
- **AI & LLM Frameworks:** LangChain · LangGraph · Retrieval-Augmented Generation (RAG) · Prompt Engineering · Vector Databases
- **Databases & Systems:** Relational DBMS · MongoDB · Computer Networks
- **Core Competencies:** System Design Concepts · Teamwork · Adaptability · Problem Solving

Open Source & Code Repositories

Personal GitHub Repositories

2024 – Present

- Published clean, documented source code for academic machine learning experiments and RAG implementation projects on GitHub.
- Maintained modular Python scripts for data cleaning, EDA, and statistical modeling workflows.
